

Greater China

Potential Tasks – for Internships, Student Projects, Master Thesis @ TÜV SÜD Greater China

Main Task is to:

- Create/Develop Concepts to support Operations based on GCN QM Input
- Development of POCs
- Implementation of POCs for Pilot Runs/Feasibility Study

Some Potential Project Examples (as guidance – always open for new Ideas)

1, Price Calculation + Communication Work Flow
Price Calculation Tool to support Sales. This tool should enable our sales to provide a quotation price independently from the operations – covering the key business areas. In addition, a communication & quality workflow to connect several departments should be established
2, Competence & Authorization IT Tool
An IT supported authorization tool and tailor-made competence tool to increase transparency and quality within GCN
3, Collaboration Platform
A platform to enhance collaboration and communication.
4, Mentoring System & Platform
Linked to Project 2, a Mentoring platform to establish and steer a mentoring program within Organization

Requirements

- Good Communication & Team-Work Skills
- Willing to create, develop and implement new things
- Bring in own Ideas
- Able to manage and drive different stakeholders
- Good Execution&Implementation Skills
- Able to work out Concepts
- Knowledge in following programming languages*
 - .net (Main)
 - Excel VBA
 - Java Script
 - PHP & SQL

Greater China

*mandatory for IT students – not mandatory but preferred for other Degrees
